

## System Administrator

**Company name:** Elephant Talk Communications Inc.

**Location:** Spain, Girona, Sant Feliu de Guixols.

**Company profile:** Elephant Talk Communications Inc. (ET) is a worldwide telecom operator/solutions provider and multi-media distribution company, with activities in Europe, the Far-East, the Middle-East and the United States. ET primarily operates in the business-to-business segment of traditional telecommunication as well as new media such as digital content distribution and VOIP services. In addition, ET's market oriented research & development has resulted in proprietary in-house developed products and solutions.

Through the intelligent design of her organisation and systems, ET is able to offer her products and solutions against very low organisational and network costs on a worldwide level.

ET is listed at the Nasdaq OTC Bulletin Board, United States, since 1994.

**Job description:** The System Administrator is responsible for:

- Maintaining existing network infrastructure.
- Linux support for Application Servers.
- Managing Databases Servers used by ET.
- Deploy new and maintain existing server security policy for both Linux and Windows.
- Assist in setting up new network sites.
- Network Monitoring.
- Creating documentation of network and hardware.
